

Vocal One – Vocal IP’s Advanced Unified Communication Platform

Vocal One is the next generation cloud-based communication service provided by Vocal IP nationwide. Vocal One unifies the widest range of communication methods on mobile and desktop platforms, including HD voice calling, chat, web and video conferencing, SMS texting and Instant Messaging to create a unified communication platform for businesses.

In today’s environment, ease of use, flexibility and mobility are musts for any business communications. Vocal One works seamlessly from desk phones, laptops, tablets and from any smartphone/mobile device. You

can move seamlessly from one environment to another, for example moving a call from a desk phone to a mobile device.

Vocal One fully integrates three of the most common communication types into a single cloud-based application; calling, messaging and meetings. By unifying communications, users gain unmatched functionality and increased productivity.

Vocal One is ideal for businesses of any size, with any number of offices and workers located anywhere in the world.
